

We're in This Together

"A healthy and safe campus is everyone's responsibility. Each of us needs to be aware of potential hazards in our workplace. Be an active participant: Read safety signs, attend training, join a safety committee, and promote a positive safety culture here on campus."

—Chancellor J. Keith Motley

- Lab safety
- General safety
- Fire extinguisher

Welcome to Environmental Health and Safety

Environmental Health and Safety (EHS) works to maintain a healthy and safe campus for all students, faculty, staff, and visitors. We promote the protection of our beautiful environment so that our entire community can enjoy this unique waterfront campus.

EHS is a resource if you have safety or environmental concerns. We are available 24/7 and are dedicated to promoting best practices that support teaching and research.
