

## Candle Safety

---

*More than half of all candle fires start when things that can burn are located too close to the candle.*

### Facts:

- ✓ According to the NFPA (National Fire Protection Agency), December is the peak time of the year for home candle fires.
- ✓ Roughly, one-third of home candle fires started in the bedroom.

### Safe Operations

- ✓ Never leave a **candle** unattended.
- ✓ Never burn a **candle** on or near anything that can catch fire.
- ✓ Keep **candles** out of the reach of children and pets.
- ✓ Never touch or move a **candle** while it is burning or while the wax is liquefied.
- ✓ Don't burn a **candle** all the way down.
