

10% discount for all data analysis projects

As a user of a core NGS facility in Genevia Technologies' partnership program, you are eligible for a flat 10% discount.

What does bioinformatics as a service cover?

- **A computational analysis plan** tailored to answer your research questions
- **Quality control and preprocessing** of the raw sequencing output
- **Exploratory analysis** to visualize trends and patterns in the data
- **Custom downstream analyses**
- **Customizing and polishing figures** for a manuscript
- **A project report** including method descriptions to use in a manuscript
- **Manuscript review** to help in reporting computational results and methods
- **Help with addressing reviewer comments**
